

Homeowners Insurance and a Home Warranty: What's the Difference?

Homeowners Insurance

vs.

Home Warranty

Designed to provide coverage for the structure and personal belongings in a home, homeowners insurance kicks in when catastrophe strikes. Events like fires, floods, wind and other accidental hazards.

A home warranty provides budget protection when your key and costly home systems (A/C, heating, electrical, plumbing) and appliances (washer, dryer, oven, refrigerator, etc.) break down due to normal wear and tear.

An American Home Shield® Home Warranty is the perfect complement to your existing homeowners insurance.
